MOT-250

MOT-250 Motorola Upgrade Cable

Upgrade an installation equipped with a Motorola style power cable to Icom, Kenwood, Maxon, Tad, Tekk, Vertex and other cost effective feature packed radios. Enables radios equipped with the standard "T" style power plug to plug directly into an existing 2 pin molded Motorola style power cable. Suggested resale price: \$18.00.

PRC-01 Ignition Sense Cable

Add ignition control to any radio equipped with a "T" style power connector. Fits Icom, Kenwood, Maxon, Tad, Tekk, Vertex and others. Eliminates the necessity of selling an expensive Icom OPC-617 or Kenwood KCT-18 and KCT-19 or add the ignition control feature to radios which are not equipped for this function. Eliminates the need to open the radio to install an accessory cable. Requires only a few milliamps of ignition controlled power to switch a robust 30 amp high quality automotive relay. "Plug and Play" - includes everything necessary to plug inline with the manufacturer supplied power cable connect to an ignition controlled voltage- even the fuse holder and fuse! Suggested resale price: \$34.00.
